DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

In regard to claims 1-9 the prior art does not disclose a digital camera with the combination of limitations specified by the claimed invention, specifically the limitations of:

a semitransparent mirror which rotates about an axis in a direction perpendicular to the optical axis of the taking lens so as to move between an advanced position intersecting at an inclination an optical path from the taking lens to the image sensor for photographing in a first photographic mode where a first position of the light transmitted by the taking lens is reflected by the semitransparent mirror and a second position of the light transmitted by the tanking lens forms an image on the image sensor, and a retracted position removed from the optical path of photographing in a second photographic mode where substantially all of the light transmitted by the taking lens forms an image on the image sensor, as claimed in claim 1.

Claims 10-17 are allowed for the reasons stated in the previous office action.

In regard to claims 18 and 19, the prior art does not disclose a digital camera with the combination of limitations specified by the claimed invention, specifically the limitations of:

a semitransparent mirror which rotates about an axis in a direction perpendicular to the optical axis of the taking lens so as to move between an advanced position intersecting at an inclination an optical path from the taking lens to the image sensor so that a first position of the light transmitted by the taking lens is reflected by the

semitransparent mirror and a second position of the light transmitted by the tanking lens forms an image on the image sensor, and a retracted position removed from the optical path so that substantially all of the light transmitted by the taking lens forms an image on the image sensor, as claimed in claim 18.

In regard to claim 20, the prior art does not disclose a digital camera with the combination of limitations specified by the claimed invention, specifically the limitations of:

wherein said digital camera is controllable under a first photographic mode wherein said optical element is set at the advanced position for photography, and a second photographic mode wherein said optical element is set at the retracted position for photography, and the optical path lengths from the taking lens to said image sensor are equalized in the first photographic mode and the second photographic mode by moving the image sensor, as claimed in claim 20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
